

Pirelli Tyre S.p.A.

Subject: Technical Bulletin BGT17_070317

Dear Competitors,

Following the continuous development and optimisation of the production process and with the aim to design products that are even more suited to the needs of the end users, in 2017 Pirelli will supply to British GT3 competitors an updated range of products.

The new GT3 SLICK product will be available in four sizes and will be marked as follows:

325/680-18 DHD
325/660-18 DHD
325/705-18 DHD
325/705-19 DHD

The GT3 RAIN product will remain unchanged and will be marked as follows:

315/680-18 WH
325/660-18 WH
325/705-18 WH
325/705-19 WH

In addition to these updated GT3 products, in 2017 there will also be an addition to the GT4 tyre range.

The 305/680-18 DHA product joins the range, specifically designed for use on MR and RR car applications. The 305/680-18 DH product will continue to be used for FR car applications.

These new products have been successfully tested in 2016. The change was necessary to standardise the products supplied to the GT3 series where Pirelli has been nominated as the sole tyre supplier.

The booklet detailing the technical parameters for each product and the operating limits will be provided in due course.

Further copies of the Pirelli technical booklet, as well as a representative of Pirelli's Technical Department, will be available during the events at the Pirelli technical area located in the trackside paddock.
