

20th March 2017

2017 British GT Championship: Championship Bulletin #1

5.4.4 Weight

The average weight of pairings will be introduced using the following procedure.

The average weight of the drivers in any car competing in the British GT Championship must be **85kg**. Should the average weight of the drivers in any specific car be less than 85kg, the car will be expected to carry Driver Ballast to compensate. The following procedure will be followed:

- i. Each drivers must declare his weight, including overalls, underwear, gloves, helmet and HANS
- ii. The average weight of the drivers in the car will be calculated and rounded up to the nearest integer (W)
- iii. If $W < 85$, then the Driver Ballast to be carried by the car will be $85-W$
- iv. The Driver Ballast must be installed in the ballast box and sealed before qualifying.

The Driver Ballast, as well as the individual weight of the drivers in question, may be checked at any point during the event. Any anomalies will be reported to the Race Director. Penalties may go as far as cancellation of times in Qualifying or Exclusion from the race.

Official weights will be recorded at Round 1 – Oulton Park. Date, time and location to be advised in the Team Timetable.
